

Outfall Inventory and Priority Ranking Matrix
Town of Middleborough, Massachusetts
Revision Date: June 2019

1. Outfalls/interconnections that discharge to or in the vicinity of: public beaches, recreational areas, drinking water supplies, or shellfish beds
2. Receiving water quality based on the latest version of MassDEP Integrated List of Waters
3. Generating sites are institutional, municipal, commercial, or industrial sites with a potential to contribute to illicit discharges (e.g., car dealers, car washes, gas stations, manufacturing)
4. Areas once served by combined sewers that have since been separated, or areas once served by septic that have been converted to sanitary sewer
5. Aging septic systems are septic systems 30 years or older in residential areas
6. Any river or stream that is culverted for distances greater than a simple roadway crossing
7. An outfall with known or suspected problems, past complaints, sewage indicators in dry or wet weather screening is automatically listed as a high priority outfall. Outfalls that are calculated to be two standard deviations above the mean are categorized as a high priority, all others, unless noted, are low priority. Investigation of all catchments must be completed by permit year 10, irrespective of priority rank. As such, defining an outfall as "high" or "low" priority is solely for the purpose of prioritization of investigation.

Outfall Inventory and Priority Ranking Matrix
Town of Middleborough, Massachusetts
Revision Date: June 2019

1. Outfalls/interconnections that discharge to or in the vicinity of: public beaches, recreational areas, drinking water supplies, or shellfish beds
2. Receiving water quality based on the latest version of MassDEP Integrated List of Waters
3. Generating sites are institutional, municipal, commercial, or industrial sites with a potential to contribute to illicit discharges (e.g., car dealers, car washes, gas stations, manufacturing)
4. Areas once served by combined sewers that have since been separated, or areas once served by septic that have been converted to sanitary sewer
5. Aging septic systems are septic systems 30 years or older in residential areas
6. Any river or stream that is culverted for distances greater than a simple roadway crossing
7. An outfall with known or suspected problems, past complaints, sewage indicators in dry or wet weather screening is automatically listed as a high priority outfall. Outfalls that are calculated to be two standard deviations above the mean are categorized as a high priority, all others, unless noted, are low priority. Investigation of all catchments must be completed by permit year 10, irrespective of priority rank. As such, defining an outfall as "high" or "low" priority is solely for the purpose of prioritization of investigation.

Outfall ID	Receiving Water	History of Dry Weather Flow Incidents	Discharge to Area of Concern to Public Health ¹	Frequency of Past Discharge Complaints	Receiving Water Quality ²	Density of Generating Sites ³	Outfall Density	Age of Surrounding Development	Historic Combined Sewer or Septic ⁴	Older Industrial Operations (40+ yrs)	Aging/Failing Sewers	Aging Septic ⁵	Long Reach of Culverted Stream ⁶	SCORE	PRIORITY RANKING ⁷
