

IMPORTANT NOTICE TO
WATER / WASTEWATER CUSTOMERS

At their meeting held on April 28, 2014 the Middleborough Board of Selectmen (Water/Wastewater Commissioners) voted to implement the following rate increases for water and wastewater/sewer customers:

- Water customers will be receiving a 4% rate increase – this increase is needed to provide for capital improvement projects including a water treatment plant, new wells and a new storage tank.

- Wastewater / Sewer customers will be receiving a 15% rate increase – this increase is needed to fund federally mandated upgrades to the wastewater treatment facility over the next several years.

These rate increases are effective with usage beginning July 1, 2014. The first bill with the new rates will be received in November, 2014.
